Sehr geehrter Herr Newsletter

Sharp-edged products can potentially damage the sterile barrier and through abrasion produce impurities on product surfaces.

We have the solution:

MEDPURPOUCH – protective pouch made of MEDPUR

Tests show that the MEDPUR material is particularly suitable for packages for sharp-edged products, because there is no abrasion if rubbing occurs.

As such the product is **not contaminated** by residue from the package and the **sterile barrier system is not damaged**.

The **MEDPURPOUCH** is simply loaded through the slit.

The user opens the package in a **user-friendly way** and takes out the product, easily and safely.

Thanks to the **defined opening point** the sharp-edged area is **protected** until shortly before use.

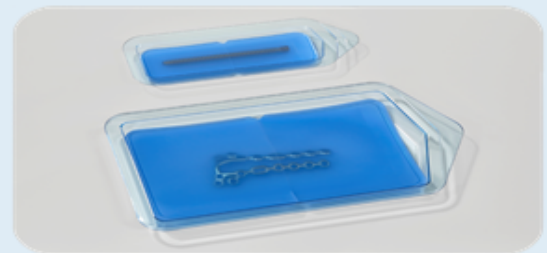

FACTS

Material:	Extruded PUR film, US Class VI tested
Thickness:	2 x 500 my
Colour:	blue tinted
Surface:	matt, glossy on one side
Production:	in clean room conditions ISO 8
Sterilisation:	suitable for gamma sterilisation up to 50 kGray
Sizes:	available in various standard sizes or as per customer request

As system supplier we can optionally also provide you with the suitable standard blister Babuschka, sealing lids and sealing machines.

Visit us at our homepage (www.medipack.ch). There you will find detailed information.

By the way:

From **17 - 19 April 2018** you will find us at the **Medtec in Stuttgart, Hall 10 / Stand 10F10**. Come and visit us – we will be happy to tell you more about our newest package solution and pamper you with our famous «Medipack-Toblerönl!»!

We will likewise be on hand with a stand (**Hall 2.2, Stand A5**) at the **SIAMS in Moutier**. The trade fair is held from **17 – 20 April 2018**.

Sincerely

Reto Artusi
Managing Director

Medtec
